

### WEDNESDAY, JUNE 25, 2025 - US SENIOR OPEN 5 PM WEATHER FORECAST

Thank goodness that little trend is over as finally look to dry this out this evening and on through the early part of the weekend. Rainfall totals with today's storms were just under 0.20 bringing our two day total to just under three quarters of an inch along with a half inch of hail. A beautiful evening is shaping up, with temperatures ticking up towards 70 degrees as winds remain fairly light from the northwest. For Thursday, more sunshine than clouds in the morning will allow temperatures to quickly heat up into the 70s before noon, topping out in the low 80s mid afternoon with winds blowing mainly from the southeast at 8 - 10 mph gusting into the mid teens at times. While our dewpoints do drop down into the 40s tomorrow, it is not instant leaving us with a window where heat and moisture could find themselves prime to produce a rogue storm, mainly between 12 - 2 PM. As we move closer to the weekend, temps will increase into the mid 80s for a high while dewpoints hold fairly steady in the low 40s, helping keep the chance for storms at arms reach while Saturday is shaping up to be near ideal as winds shift to the NE.
