

SUNDAY, JUNE 29, 2025 - US SENIOR OPEN 5 AM WEATHER FORECAST

Winds will remain primarily from the north throughout the day Sunday, starting from the northwest as the sun is coming up and slowly drifting over to the northeast then this afternoon as intensity increases dramatically during the our 12 - 4 PM storm window that is expected to include gusts near 30 mph at times. Overall, averages for the day will start out light at 4 - 5 mph then up to 8 - 10 mph as intensity ramps up with approaching cells as flow moves to the north while then returning to there late this afternoon and evening as storms move off to our east to wreak havoc on the Plains. Temperatures will be cooler today as flow moves in from the north, starting out this morning in the upper 50s with dewpoints near 42 degrees clear skies will have temps finding that rapid heating pace once again, up into the 70s between 8 - 9 AM and topping out in the low 80s just after 11 AM while dewpoints tag along, climbing up into the mid 50s to help support the early afternoon storms forming over the eastern base of the Rockies from Denver down into southern CO that will have us see up to a quarter of inch of rain and an abundance of electricity.
