Winds (mph)	NE-E 5-10 G 10-15	NE-SE 6-12 G 18-22	W-NW 5-10 G 15-20

Extended forecast – Cloudy skies are expected on Saturday as the remnants of Hurricane Isaias moves towards the region. The first round of rain is likely to begin between 5-7pm Saturday. These first wave of showers would have a low-moderate lightning risk but rainfall through midnight is light. Overnight and through 8am Sunday will be the heaviest of the rainfall. Light to moderate scattered rainfall is then expected throughout Sunday. Winds will pick up with this system gusting into the 20s throughout Sunday. The direction will remain generally easterly but at times will have a north or south component. A low chance of light fog is possible Saturday morning, but it would quickly dissipate after sunrise.
