Winds (mph)	ENE 30-35 G40-45	ENE 32-37 G42-47	S → SSW 15-20 G20-25	SSW → SW 20-25 G25-30

Extended forecast – Scattered showers Sunday morning should gradually become widespread rain squalls during the afternoon with this activity set to persist through the night. Strong east-northeasterly winds will occur on Sunday, sustained at 30-37 mph and commonly gusting between 40-47 mph. A few higher peak gusts around **50 mph** are likely to occur within rain squalls Sunday afternoon. A few embedded thunderstorms may develop late Sunday afternoon with chances lingering on Monday. Scattered rain (heavy at times) Monday morning should become more widespread in the afternoon due to a nearby area of low pressure and stalled frontal boundary across Bermuda.

Forecast prepared by meteorologist Joe Halvorson.
