**Extended forecast** – A deep pocket of moisture will spread across Puerto Rico tonight and this should result in a significant uptick in shower coverage/intensity. Heavy downpours and even a rumble of thunder can't be ruled out. Shower coverage/intensity is expected to diminish after sunrise Saturday, although a low threat for showers could persist throughout the day. Another period of showers will be possible Saturday night into Sunday morning. Little fluctuation in winds are expected with gusts of 25-30 mph developing each day. Brief bursts of 30+ mph winds are possible in/near showers.
