Temp (min/max)	70/78	66/74	62/80
Winds (mph)	ENE 5-10	NE 10-15 G20	NE 10-15

Extended forecast– A low-pressure system over Illinois will move east across Indiana and Ohio Saturday into Sunday. This will bring the chance for scattered showers and isolated thunderstorms on Saturday. As the low passes to the south of Michigan, deeper moisture will move across the area Sunday. Areas of rain and embedded thunderstorms will slowly move across Southern Michigan producing heavy rainfall at times. 1"-3" of rain will be possible depending on where the heaviest bands set up. The system will push east of Detroit late in the day with improving conditions.

Forecast prepared by meteorologist Stewart Williams.
