Temp (min/max)	66/89	69/77	66/80	64/82
Winds (mph)	W→SW 5-10	ENE 5-10	NE 10-15	NE 7-14

Extended forecast– Clouds will be on the increase Friday ahead of the next system with skies becoming mostly cloudy during the afternoon. An isolated shower or thunderstorm may develop during the evening hours with the higher precipitation chances holding off until after midnight. Upper-level energy will move across the region Saturday producing numerous light to moderate showers and isolated thunderstorms as we go through the day. Scattered showers will likely linger over the Detroit area Sunday, before drier conditions return late in the day.

Forecast prepared by meteorologist Stewart Williams.
