

SATURDAY, JUNE 20, 2026 – 5 AM WEATHER FORECAST

The wind let up last evening, but it has picked back up again overnight as a little disturbance swings across New England today giving them more clouds and echoes on radar. Down here across Long Island, we'll see sunshine this morning mix with a few clouds this afternoon. Temps in the upper half of the 60s to start this morning will climb close to 80 degrees this afternoon. The humidity will be pretty low today with dewpoints not far from 50 degrees thanks to west and northwest winds most of the day. The peak of the winds has come earlier and earlier in the models over the last few days with speeds sustained in the 16-22 mph range for several hours from breakfast through lunchtime before slowly dropping through the teens by mid afternoon and then sinking down below 10 mph more often by the time we finish. Gusts over 30 mph are most likely this morning, then we'll see those gusts be more in the 20s this afternoon as the wind eventually becomes much lighter tonight into Sunday morning. Once sunshine Sunday morning heats us into the mid 70s by noon, southwest winds will come onshore tomorrow afternoon to cool us back down.
