Extended forecast – Friday is likely to remain dry with any isolated showers expected to remain offshore under partly cloudy skies. Anticipate a mix of sun and clouds this weekend as an upper-level trough promotes the development of isolated showers on Saturday with a few more showers possible on Sunday. Breezy west-northwesterly winds are forecast to develop after 11am Friday and Saturday. The temperature will start off in the mid-70s each morning before rising into the mid-80s each afternoon.

Forecast prepared by meteorologist Joe Halvorson.
